Re: Visibility of Center for Integrated Sciences -Skidmore College

Looking toward the June 26th meeting when the ZBA will consider SEQRA, we don't want to assume that the board members know the views into campus from the surrounding streets. As a result, this memo includes some photos from the nearest surrounding streets looking toward the new building area for the CIS project.

The photos demonstrate that existing vegetation that will remain blocks any view of the building area.

Let me know if you have any questions.
