December 9, 2022

Beginning in late September 2022, my firm began a digital forensic examination of two mobile devices belonging to two former elected City of Saratoga Springs NY officials.

One device contained 22.9 gigabytes extracted and analyzed data. The second device contained considerably more information with 312 gigabytes of data extracted and analyzed.

The second device required considerably more time to accomplish the requested tasks.

Respectfully,

Kevin M Connolly
Firm Owner
